May 31, 2017

Dear Shrewsbury Borough School Community,

Our school system is committed to protecting student, teacher, and staff health. To protect our community and be in compliance with the Department of Education regulations, the Shrewsbury Borough School tested our schools' drinking water for lead in accordance with the Department of Education regulations.

Following instructions given in by the New Jersey Department of Environmental Protection, we completed a plumbing profile for the Shrewsbury Borough School. Through this effort, we identified and tested all drinking water and food preparation outlets as required.

Please be advised that all locations tested showed a result well below the state mandated action level of 15 ug/L or 15 parts per billion.

The testing results are posted on the district's website.

Sincerely,

Brent A. MacConnell
Superintendent
